IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant : Johann Michael KOEHLER
Serial No. : 09/914,874
Filed : September 5, 2001
For : MICROCOLUMN REACTOR
Group Art Unit : 1764
Examiner : UNKNOWN

Certificate of Mailing Under 37 CFR 1.8

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to Mail Stop DD, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450 on March 10, 2004.

C. Bruce Hamburg

INFORMATION DISCLOSURE STATEMENT

Sir:

Submitted herewith is an Information Disclosure Citation together with copies of references referred to therein.

The Kessler and Ulmanns publications describe standard bioreactors used for fermentation processes. All types of bioreactors and further mechanical equipment are depicted in Figures 19.8 to 19.10 on pages 447 and 448. Kessler

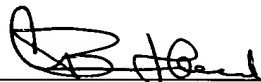

also describes, on page 448, a reactor type using enzymes immobilized on a medium for chemical reaction. A micro-column reactor for carrying out reactions on solid phases and/or biological cells comprising substrate wafers used for synthesis and separation processes is not mentioned in Kessler.

Ullmanns is an outline of fluidized bed reactors for performing chemical reaction. This chapter summarizes state of the art techniques on fluidized bed reactors as well as advantages and disadvantages of fluidized bed reactors compared to other techniques such as solid bed, stationary bed or pneumatic transport. A micro-column reactor for carrying out reactions on solid phases and/or biological cells comprising substrate wafers used for synthesis and separation processes is not mentioned in Ullmanns.

Respectfully submitted,

Jordan and Hamburg LLP

By

C. Bruce Hamburg
